

# 2006-02-23 Pbar Department Meeting

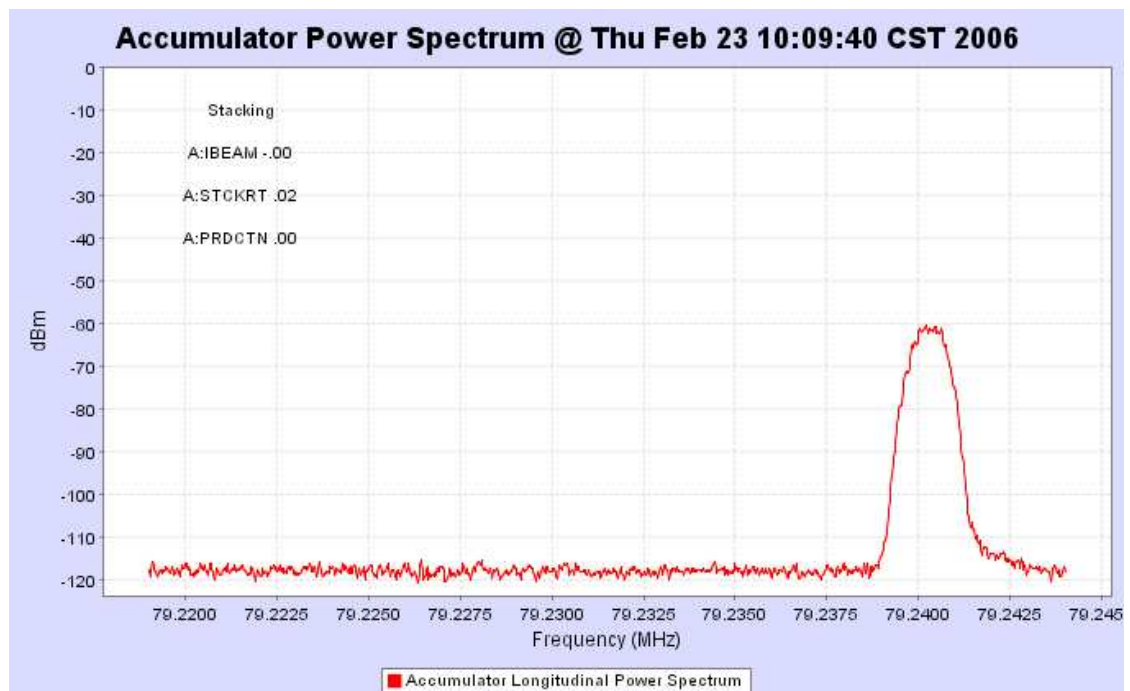

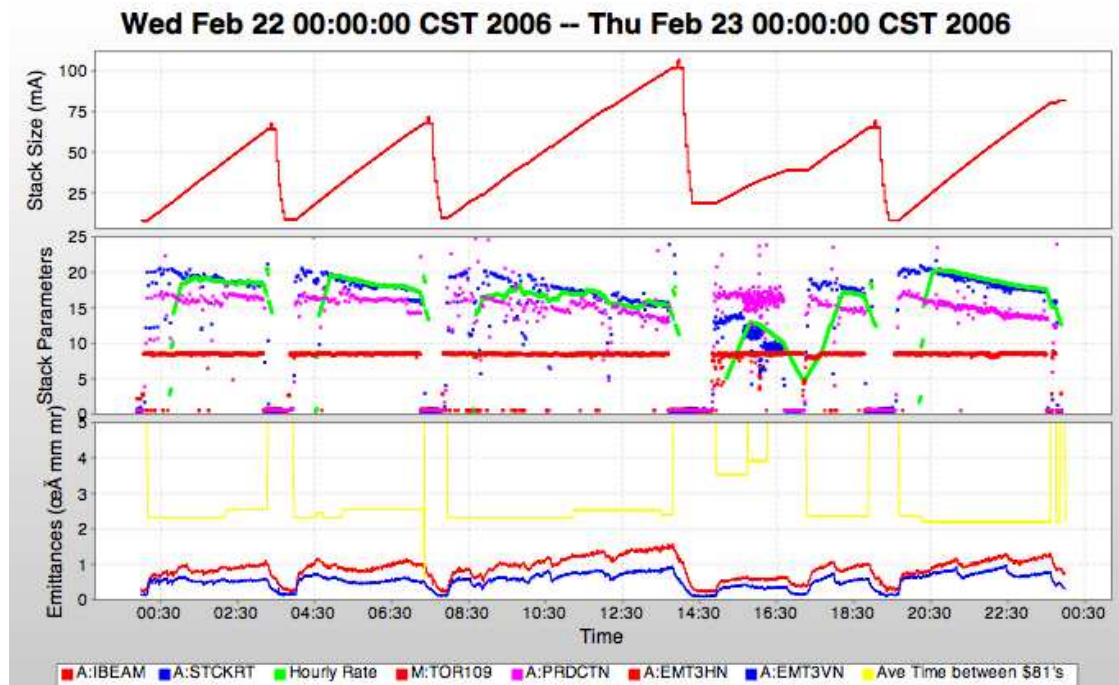

Thursday, February 23, 2006  
10:02 AM

Machine Coordinator: Vladimir

Machine Conditions: Preparing for shutdown

- Department news, announcements
  - Last beam sometime on Saturday? No short batch studies?
  - All we can do is stacking studies and documentation.
  - Encouraged to do slow cycle times
  - Enforced slip-stacking mode.
  - MI Lambertson scans will happen this morning, we document this afternoon.
  - Studies -
    - Run stacking with 2-4 GHz core off
    - 53MHz bump in debuncher
    - Measurement of combined admittance
    - Spot size on target.
- Performance

- **Studies: Accumulator apertures - where we are?**
  - Aperture not as good as golden 1999 orbit
  - Horizontal
    - Normal quad pickup (A10)
  - Vertical
    - Tank 601 (A60 - u/s stacktail leg 1)
    - Tank 602 (A60 - core 2-4 GHz dp cooling p/u)
    - U/S end of 4-8GHz core dp kicker (A50)
    - Wide band pickup (A10)
- Debuncher BPMs
- Weekly Operational Summary
  -
- Studies

- 
- The Plan
-
